

Committed to life. **Scalable capacity for medical infrastructure.**

Delivered in months, not years.

Prefabricated, high-specification building solutions for healthcare and medical research, industrially manufactured and tested in Sweden, designed for permanent quality and rapid deployment.

Faster to first patient.
Lower lifecycle cost. Higher built-in compliance.

50%

FASTER DELIVERY

Parallel factory production and on-site groundworks compress total project timelines by up to 50% versus conventional construction. Faster access to capacity, lower carrying cost.

100%

FACTORY-VERIFIED QUALITY

Ventilation, medical gases, electrical and control systems are installed, tested and validated in a clean, controlled factory before delivery, not pieced together on site.

50_{+yr}

BUILT TO PERMANENT STANDARDS

Robust industrial construction with a service life equivalent to traditional builds. Same regulations, same standards, designed for relocation and reuse across multiple lifecycles.

Healthcare environments where high requirements meet advanced technology.

Carefully developed and manufactured in Sweden, fully tested before delivery.

A HERITAGE IN INDUSTRIAL PREFABRICATION

Four decades of building when others can't.

MedicSolution Nordic builds on more than 40 years of industrial prefabrication experience, with roots in Emtunga Mekaniska Verkstad. We deliver the entire technical building solution: from design and production to fully operational functionality. One responsible supplier, one accountable point of contact, one assured outcome.

+ Single point of responsibility

Design, production, delivery, commissioning: one supplier, one contract, one accountable team.

+ Reduced site disruption

Up to 95% of work completed off-site. Minimal noise, traffic and downtime for clinical operations.

+ Designed for reuse

Relocate, refurbish or repurpose units across multiple lifecycles as needs evolve.

Choose the deployment model that fits *your need, your site, your timeline.*

From integrated room-in-room operating theatres to ultra-mobile crisis platforms, every MedicSolution product is engineered to the same Swedish standard, with single-supplier accountability from design through commissioning.

Prefab critical-care rooms, integrated within the building

Operating theatres, ICU and sterile rooms manufactured and tested in the factory, then lifted into the hospital structure. Up to 40% faster than on-site builds for critical environments.

Best for: New hospital builds · OR theatres, ICU, CSSD · Cleanrooms ISO 5 to 8

Prefab extension attached to existing facilities

Turnkey expansion module bolted to or placed adjacent to an existing hospital. Continues operations during renovations or capacity shortages. Permanent or temporary, rent or purchase.

Best for: Renovations · Evacuation cover · Capacity shortages · Diagnostics (CT/MRI/X-ray)

Freestanding healthcare buildings for long-term operation

Fully prefabricated, scalable, independent buildings with 50+ year service life. Self-contained capacity for new regional clinical hubs, with the option to expand, refurbish or relocate later.

Best for: New regional hubs · Inpatient wards · Diagnostics · Labs · Specialist functions

Ultra-mobile, self-sufficient unit. On-site within 24 hours.

Autonomous medical platform delivered, deployed and technically commissioned within 24 hours of call-off (Nordics & Northern Europe). CFU below 5 in surgery. Truck, ship or aircraft transport.

Best for: Crisis response · Capacity reserve · Emergency surgery · ICU · Preparedness subscription

CASE STUDY

HUDIKSVALL HOSPITAL · REGION GAVLEBORG

Six operating theatres installed in three days. Surgery never stopped.

During a full renovation, MedicSolution delivered three Add-On modules housing six fully equipped operating theatres, prep rooms, sterile zones and supporting infrastructure. Built to permanent quality, leased for the renovation, ready for relocation afterwards.
